

Wastewater Treatment & Sludge Management Solutions from Komline-Sanderson

Pump. Thicken. Dewater. Dry.

Komline-Sanderson designs and manufactures innovative solutions to wastewater treatment and sludge management problems facing industrial plants and municipal wastewater treatment facilities. K-S is a leading global supplier of equipment and systems for clarification and sludge processing.

Komline-Sanderson equipment and technology is used for clarifying wastewater to meet discharge regulations, reduce costly surcharges, or recover valuable products and water for reuse. K-S helps customers reduce sludge volume by thickening, dewatering and drying, reducing disposal cost and impact. Thermal processing also converts some waste products to useful by-products or fuel.

Belt Filter Press

- sludge dewatering
- high cake solids
- low polymer cost

Gravity Belt Thickener

- sludge dewatering
- high cake solids
- low polymer cost

Paddle Dryers

- indirectly heated
- produce Class A product
- high efficiency

Dissolved Air Flotation

- clarify wastewater
- reduce surcharges
- recover product

Rotary Vacuum Filter

- sludge dewatering
- clarify wastewater
- continuous operation

Filtration Media

- vacuum filters
- pressure filters
- belt filter presses

Plunger Pump

- sludge transfer
- positive displacement
- high lift

Komline-Sanderson also offers:

- Process filtration
- Process drying, heating and cooling
- Rotary atomizers for dry scrubbing
