Komline-Sanderson develops, designs and manufactures innovative solutions for industrial filtration and thermal processing applications for a wide range of industries.

Our experience with process applications ranges from simple separations to complex multistage applications involving filtration, cake washing and drying. By offering a variety of technologies, Komline-Sanderson can help you select the optimum solution to meet your needs.

**Horizontal Vacuum Filter**
- continuous filtration
- counter-current cake washing
- corrosive slurries

**Rotary Drum Vacuum Filter**
- continuous filtration
- thin or thick slurries
- multiple cake discharge designs

**Filtration Media**
- vacuum filters
- pressure filters
- belt filter presses

**Paddle Dryer • Paddle Processor • Paddle Cooler**
- indirect heating using steam or thermal fluid
- indirect cooling with water/glycol
- high heat transfer rates

**Rotary Atomizer**
- spray dryers
- dry scrubbers
- direct drive, variable speed

**Wastewater Treatment & Sludge Processing**
- Clarification
- Pumping
- Dewatering
- Drying
